

GADGETS

LET OUR TECH EXPERT **CATHERINE DE PICARDA** GUIDE YOU THROUGH THE MAZE OF WIRES AND BUTTONS.

Q CAN YOU SUGGEST A LIGHTWEIGHT CAMCORDER TO TAKE WITH ME ON MY UPCOMING TRIP THROUGH EUROPE?

LIZ, NSW

A Lugging a bulky camera around on a long-haul trip is the last thing any girl needs – especially when it takes up valuable shopping space in the old suitcase.

With that in mind, the super-cute Millennium Pocketeye Full HD Camcorder has both an 8cm

touch screen and healthy 8GB memory card, meaning this little beauty will slip neatly into your handbag and still be able to capture stacks of high-quality footage as you check out the sites – and shops!

Then, when it gets chockers with awesome vacation visuals, you can download the videos straight onto your laptop and start filming all over again.

The best part? It's compatible with Windows 7, Vista and XP. Visit www.millennius.com.au for more information.

Millennius
Pocketeye Full HD
Camcorder, \$199
